PROFESSIONAL SUMMARY

Final-year BS Information Technology student (7th semester) at Virtual University of Pakistan, building full-stack web projects with React, Node.js and Python — including an IoT classroom energy optimizer (ESP32, FastAPI, React, PostgreSQL) and a live Study & Task Tracker. Currently completing a 300-hour full-stack web development bootcamp.

TECHNICAL SKILLS

Programming Languages: HTML5, CSS3, JavaScript, PHP, Python, C++

Web Development: Responsive web design, CSS selectors and cascading, React, Node.js, Tailwind CSS, WordPress, WooCommerce, Elementor, Astra

Concepts: Object-Oriented Programming (OOP), data structures, database fundamentals, REST APIs, software development fundamentals

Databases: MySQL, PostgreSQL

Backend and Tools: FastAPI, Git, GitHub, Visual Studio Code

Networking: Computer networks basics, network architecture, IPv4 / IPv6 addressing

Soft Skills: Problem-solving, communication, teamwork, time management, willingness to learn

PROJECTS

IoT-Based Classroom Occupancy and Energy Optimizer - Final Year Project (CS619)

In Progress

ESP32, C++, Python, FastAPI, React, Tailwind CSS, PostgreSQL, scikit-learn

- Building a low-cost IoT system using an ESP32 with PIR motion, LDR light, and DHT11 temperature and humidity sensors to monitor classroom occupancy and reduce wasted electricity.
- Sensor readings are sent over Wi-Fi via an HTTP API to a FastAPI backend, validated, and stored in PostgreSQL for each classroom.
- Developing a web dashboard for live readings, activity history, graphs, energy estimates, lighting rules, and manual override, with rule-based lighting control and an occupancy prediction model.

J. Website - Multi-Page Website

Bootcamp Project

HTML, CSS

- Built a multi-page website with HTML and CSS as a bootcamp project, covering all of its web pages, layout and styling.

Study & Task Tracker - Web Application

Project

JavaScript, Vite, Tailwind CSS — Live: https://task-tracker-ochre-six.vercel.app/ — Repo: https://github.com/muhammadAbdullah-alt/Study-Tracker

- Built a web application to organise study tasks, track progress, and manage daily work in one place.
- Applied front-end development skills in HTML, CSS, and JavaScript to create a clear, usable interface.

PROJECTS (CONTINUED)

DemoMart - E-Commerce Website Project
WordPress, WooCommerce, Astra, Elementor

- Built a complete demo online store with product listings, cart, and checkout, configured for PKR pricing and Cash on Delivery for Pakistan, using Astra and Elementor with replaceable demo products.

BrightNest Cleaning Co. - Business Website Concept (Fictional) Project
HTML, CSS, JavaScript — Live: https://muhammadabdullah-alt.github.io/brightnest-cleaning-co/

- Built a premium cleaning business website concept with services, pricing, an interactive quote calculator, FAQ and booking interface — clearly labelled fictional, not a real client website.

Student Result Analyzer (CS310) 2026
PHP

- Built a single-file PHP program using an indexed array of five students' marks, a for loop, and if-elseif-else grading logic, with pass / fail counters. Verified by running: no syntax errors, 4 passed and 1 failed in the test data.

EDUCATION

BS Information Technology - Virtual University of Pakistan 2023 - Present
Currently in 7th semester.

Full-Stack Web Development Bootcamp Oct 2026 - Present
2-month programme, 300 credit hours. Started 25 October 2026.

Intermediate in Computer Science (ICS) 2021 - 2023

Matriculation (Biology) - Al-Hamra School and College 2021
Focus on Science and Mathematics.

CERTIFICATIONS

- **Claude 101** - Anthropic, Oct 2026
- **Web Development Course (3 Months)** - NAVTTC, 2025
- **CCNA: Introduction to Networks** - Cisco Networking Academy, 2025
- **CPA: Programming Essentials in C++** - C++ Institute, 2024
- **Freelancing & Graphic Design** - DigiSkills, 2023

ADDITIONAL INFORMATION

Location: Lahore, Pakistan - available for remote work.

Languages: Urdu - Native / Bilingual; English - Intermediate / Conversational.
